

# AUDIT OF ENERGY TRANSITION POLICY AS PART OF CLIMATE CHANGE MITIGATION

Feisal  
SAI Indonesia

Astana, 23 August 2023

Implementing ministries

## Major Milestones

- National Energy Planning enacted in 2014
- Paris Agreement ratified in 2016
- First NDC of Indonesia published in late 2016

## Audit Objective

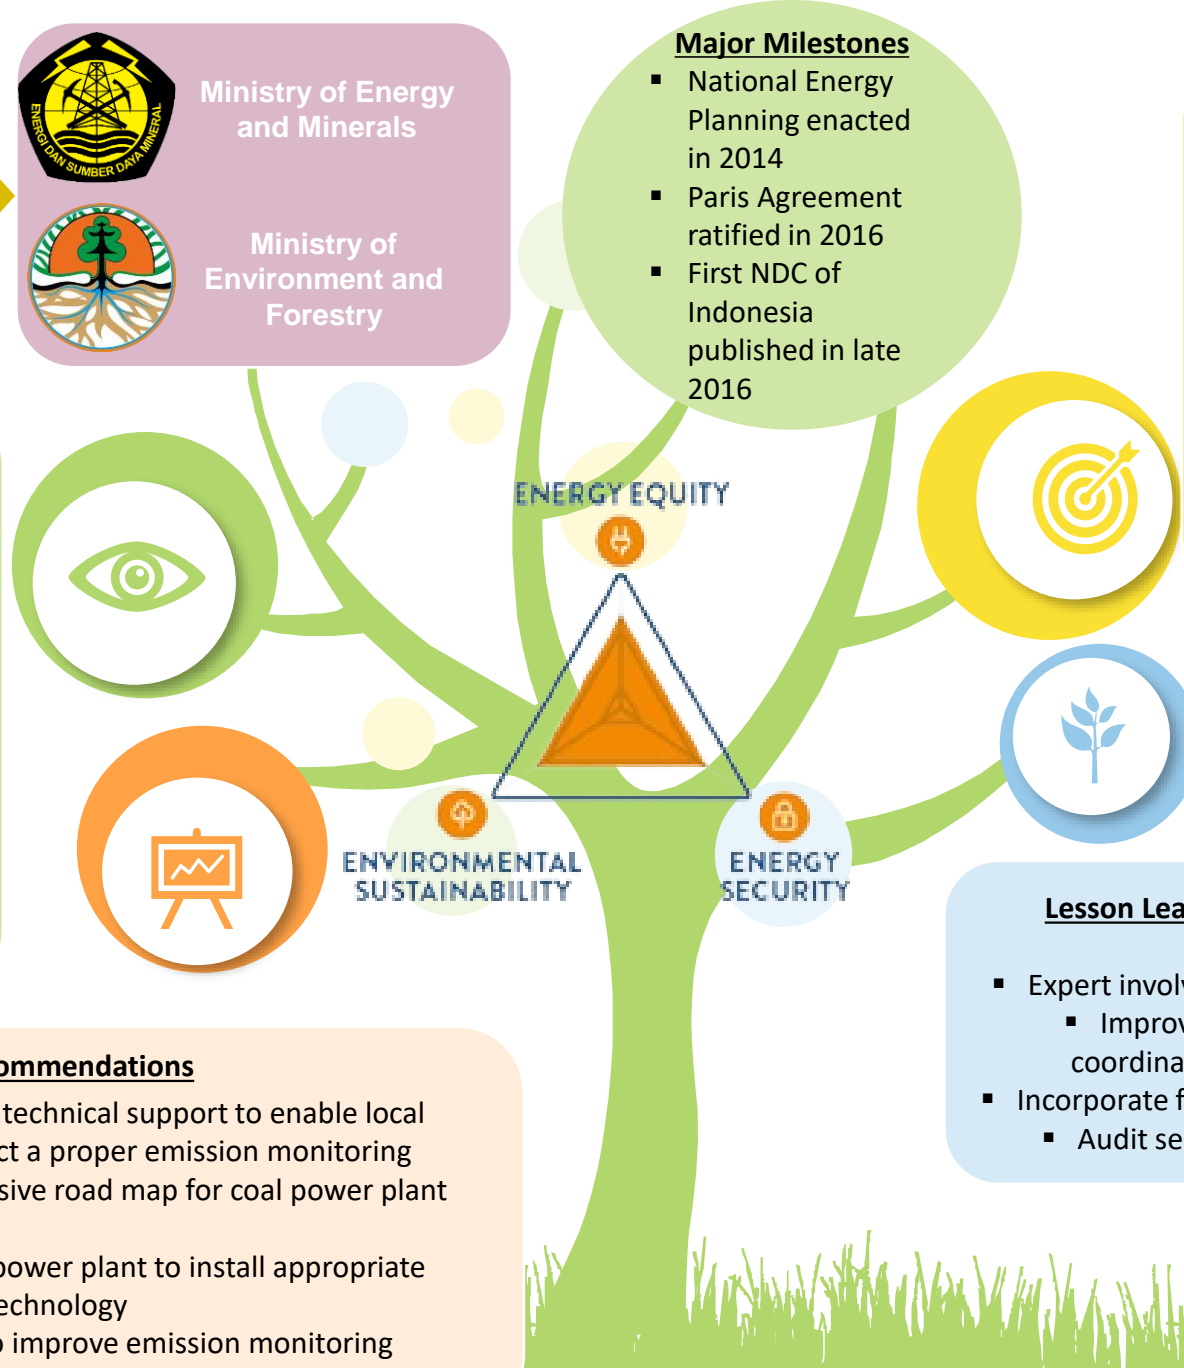

To assess the management of primary energy in electricity sector, to ensure the energy security, affordability, and sustainability as well as the environmental externalities of energy management

## Rooms for improvement

- lack of support from local government in emission monitoring
- limited analysis on coal power plant early retirement
- limited progress in implementing emission control technology
- inadequate emission monitoring

## Recommendations

- provide guideline and technical support to enable local government to conduct a proper emission monitoring
- develop a comprehensive road map for coal power plant early retirement
- provide incentive for power plant to install appropriate emission controlling technology
- initiate cooperation to improve emission monitoring

## Lesson Learnt

- Expert involvement
  - Improve coordination
- Incorporate foresight
  - Audit series
